

What's New?

(v 7.0)

March 2019

- For Administrators
 - We're working on your level of access! Now you're able to see student results and teachers' class results as a whole. Reach out to support@kandoolu.com to get your account set up.
- For Teachers
 - We added a NEW part of the system, Mission Control (math grades 3-8)! You can assign "missions" to students—with all brand new content—for them to practice working on specific math skills. Great for out of school time or free time!
 - This is in its testing phase. If you're interested in using it with your students, please reach out to support@kandoolu.com to get this module turned on for you!
- For Students
 - We added a NEW part of the system, Mission Control (math grades 3-8)! Students can jump into missions—with all brand new content—without waiting to be assigned something so they can practice specific math skills. Great for out of school time or free time!
 - In Mission Control, students collect points based off of how they do in each mission, and can buy spaceships once they collect enough points!
