

What's New?

(v1.2)

April 2017

- Kandoolu teachers now have their own Class Libraries! This is a place for teachers to upload files or input links to websites, all via a file folder system that is similar to what you're used to on a computer!
 - When students are in Kandoolu, they can click on their teacher's name to visit their Class Library.
- Schoology integration is here! Sign in and sync your Schoology roster with Kandoolu and automatically have Kandoolu groups created based on your Schoology courses as well.
- The wording of our left hand menu items have changed slightly, making everything consistent now.
- You may notice some subject filters in place on certain pages (All subjects or Mathematics)-this is because we are gearing up to add ELA content- coming this fall!
