Kandoolu

What's New?
(v 2.0)

August 2017

o Standards Coverage Report- teachers can now quickly generate a report on standards that they've covered in Kandoolu. This pulls up a colorful chart to see how students are doing on each standard.

o Ability for teachers to recommend resources to OHS. We have a pretty comprehensive resource bank but recognize that we can't possibly have found all of the great resources out there! Now teachers can submit their own resource suggestion. We will review all suggestions, and after a thorough vetting process, will decide whether to add them to our Kandoolu bank.

o The font has been changed on username/password print-out cards. The old font was difficult to read, so it has been updated!

o Parent letters are here! Quickly generate PDF letters that are personalized to each student, and address what Kandoolu is as well as how students can login.

o Ability to see password when logging in. It's the little things in life…. Now when you are logging in, you can check the box to see what password you are typing in. This makes things a lot easier, especially for younger students!
