

What's New?

(v 7.4)

October 2019

- For Teachers
 - You can now create copies of your own quizzes! This allows you to tweak a previous quiz or just give it again without affecting results from the original version.
 - Mission Control will now be enabled by default for all users!
 - The standards coverage report now has an export to csv option.
- For Students
 - Mission Control is ready for you to get your practice on! Students can jump into math missions—without waiting to be assigned something so they can practice specific math skills. Great for out of school time or free time!
